## Seasons's Greetings

Abdominal trauma includes in its spectrum both blunt and penetrating injuries and resulting in both solid organ injuries and hollow viscus injuries. The spectrum of trauma and other intra-abdominal pathologies are wide and variable that necessitates precise and urgent radiological interventions and multimodality treatment for optimal patient outcome. Traumatic injuries may be potentially life-threatening but may also be accompanied by subtle or delayed clinical manifestations.

Surgeons should have exposure to the latest updates and comprehensive knowledge on this important topic. Including management of Trauma or victims of other Emergencies not only in hospital environment but also in public places or roadside. With these objectives, we are organizing the **Annual ASICON-CME 2023** with the Theme - '**Abdomen: Trauma and Emergencies**' on **6th & 7th May 2023**.

We have arranged a comprehensive 2- day session that includes a **Cadaveric workshop on Abdominal Emergencies** on the first day of the CME, 6th May (Saturday). This would include both Solid organ and Hollow viscus surgeries in **Deen Dayal Upadhyay Hospital, New Delhi** under the able guidance and mentorship of experienced Faculty. The Second day will feature expert talks, debates, panel discussions and the **CME in CSOI, Chanakyapuri, New Delhi**. Another highlight is the **5th Dr K C Mahajan memorial Oration** by a surgeon of international repute on Sunday, 7 th May.

Eminent teachers, practicing surgeons and young colleagues will be sharing their expertise to enrich the knowledge of the surgical fraternity. We also would be organising Basic ATLS concept training for young surgeons and Residents as well as discussing ways of improving surgical training.

A sincere effort is being made to communicate this message to all the medical colleges and hospitals across Delhi and its neighboring states. Registration forms will be available on the website and also can be collected from the conference secretariat. We solicit your participation in the CME, and invite all Residents and Faculty to this one-of-a-kind CME. All the details are available on [www.asiconcme.com](http://www.asiconcme.com). Residents are invited to register for the Cadaveric workshop and the CME and send in their abstracts for the Poster presentation as well as apply for the Quiz.

Thanking you

Organizing committee, ASICON-CME 2023
